China's EV battery leader CATL to step up use of AI in R& D: founder

The founder and chairman of Contemporary Amperex Technology Ltd (CATL) said his company plans to ramp up the use of artificial intelligence in research and take Chinese battery

CATL wins WEF award for AI battery design system

CATL has received the World Economic Forum's 2026 MINDS Award for its AI-powered battery cell design platform, which the organisation described as a global benchmark for AI-driven

Chinese Battery Giant CATL Ready to Rattle the World With AI

Tesla (TSLA) battery-maker CATL has vowed to ramp up the use of AI and drive Chinese EV technology further around the world. Claim 70% Off TipRanks Premium Unlock hedge fund-level

CATL's sodium-ion battery targets brutal EV range loss in winter

CATL, the world's largest electric vehicle battery manufacturer, is advancing sodium-ion battery technology that it says could help address one of the most persistent complaints among EV owners

BMW & CATL: EU-Batteriepass und Chinas Überkapazitäten

BMW und CATL unterzeichnen eine Absichtserklärung für den EU-Batteriepass. Dahinter steckt mehr: China geht gegen Überkapazitäten vor. Die Maßnahmen betreffen den Export und

CATL und BYD: Chinas Batteriegiganten im Vergleich

Investitionen in CATL und BYD bergen jedoch auch Risiken. Geopolitische Spannungen und Zölle auf chinesische Batterien könnten die Expansion bremsen. Während CATL in den USA als

CATL, BMW Ink MoU to Deepen Cooperation on Battery Passport and

CATL has announced that the company has signed a Memorandum of Understanding (MOU) with the BMW Group in Beijing to strengthen collaboration on pilot projects on trusted data

CATL and BMW sign MOU on battery passport data and supply chain

Chinese battery manufacturer CATL and BMW Group have signed a memorandum of understanding (MOU) to deepen cooperation on decarbonisation and battery data governance

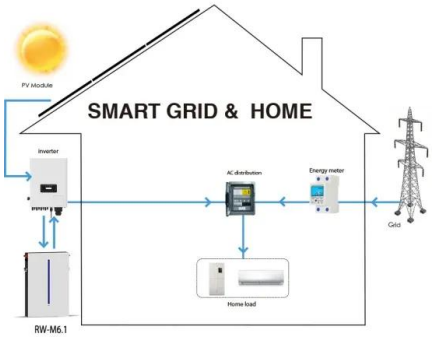

CATL sodium-ion battery aims to improve EV winter range loss

A common element found in table salt may hold the key to powering China's next wave of electric vehicle (EV) adoption. Cars featuring a sodium-ion battery, an emerging technology, are

Another one? Battery plant in Hungary started investigation after

A Chinese-owned battery manufacturing facility in eastern Hungary has launched an internal investigation after allegations surfaced that workers were poisoned at its Debrecen facility.

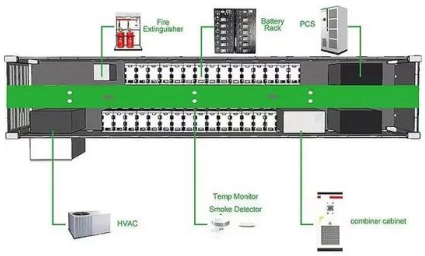

CATL vs. BYD: Sodium-Ion Battery Development Strategies in

Executive Summary CATL and BYD represent the vanguard of sodium-ion battery (SIB) development in China, with CATL demonstrating overwhelming dominance in patent volume and a broad ecosystem

Gasgoo Weekly Highlights , CATL and BMW Launch Battery Passport

Looking ahead, CATL and BMW Group will continue to implement these initiatives, leveraging technological innovation and supply chain synergy to drive the green and digital

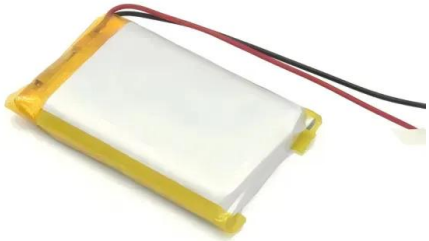

China: Changan Motor and CATL announced world's first mass

In February 2026, Changan Motor and CATL unveiled the world's first mass-produced electric vehicle powered by sodium-ion batteries (SIBs), with plans to bring it to market by mid-2026.

CATL Expands Battery Swap Ecosystem as GAC Aion and Arcfox

CATL is expanding support for its battery swap ecosystem as Chinese automakers GAC Aion and BAIC's Arcfox prepare to launch new electric vehicle models compatible with the

CATL founder says battery giant will cooperate globally on new

Chinese battery giant Contemporary Amperex Technology Co., Ltd. (CATL) will continue to work hard& nbsp;with counterparts around the world to make outstanding contributions to the new

CATL and BMW Sign a MOU to Deepen Cooperation on Battery

Under the MOU, CATL and the BMW Group will collaborate on pilot projects on cross-border data transfer under the Battery Passport scenario, deepening cooperation in exploring trusted

Natrium-Ionen-Batterien: technischer Aufbau und Funktionsweise

Technologischer Durchbruch der Natrium-Ionen-Batterien mit beeindruckender Schnellladefähigkeit zur Serienreife. Natrium-Ionen-Batterien: technischer Aufbau und

Global EV Battery Usage Rises 10.7% in January as CATL Expands

Global electric vehicle battery usage reached about 71.9 gigawatt-hours in January 2026, representing a 10.7% increase compared with the same month a year earlier, data from South

BMW and CATL partner for the upcoming EU battery passport

Chinese battery giant CATL and premium car manufacturer BMW aim to deepen their existing partnership. In a new letter of intent, the focus is specifically on data exchange: Both parties

CATL chairperson vows to ramp up use of AI in R& D, take Chinese battery

Zeng said that CATL's battery products power more than 20 million vehicles across dozens of countries and regions worldwide and more than 3,000 energy storage stations.

About us

We have become the world leader in both the supply of battery energy storage systems and electric car batteries sold. We have been working on battery replacement projects and production has started at

Tesla ditching Chinese Megapack batteries for American-made cells

The Lathrop Megafactory, in particular, has the capacity to produce 10,000 Megapacks annually, and they all use CATL batteries, making them a potential target of federal Chinese import
