Topclass Solar

Comap intelineo 5500

Comap intelineo 5500

InteliNeo 5500 1.1 Datasheet , PDF , Electricity

InteliNeo 5500 Order code: INEO5500BAA Controller for parallel hybrid applications Datasheet Product description InteliNeo 5500 is a microgrid controller that offers

ComAp - InteliNeo 5500

The ComAp InteliNeo 5500 is a microgrid controller designed to integrate traditional power sources, such as grid connections or generator sets (gen-sets), with renewable energy sources and Battery

InteliNeo 5500 ComAp , Servintel International

The InteliNeo 5500 is a microgrid controller that offers a cost-effective solution for combining traditional grid or gen-sets with renewable energy sources to create a reliable and efficient power generation

ComAp controller InteliNeo 5500

The InteliNeo 5500 is a microgrid controller that offers a cost-effective solution for combining traditional grid or gen-sets with renewable energy sources to create a reliable and efficient power generation

ComAp

The InteliNeo 5500 is an all-in-one solution featuring a full-colour display and is designed to be a master controller in a smaller microgrid site. The InteliNeo 5500 still controls multiple sources of energy, in

InteliNeo 5500 1.1.0 Datasheet

InteliNeo 5500 is a microgrid controller that offers a cost-effective solution for combining traditional grid or gen-sets with renewable energy sources to create a reliable and efficient power generation system.

InteliNeo 5500 1.2.0 Datasheet

Key features Modbus Client support of up to 9 devices for RTU/TCP communications to inverters and storage systems Cooperates with up to 3 gen-set/mains controllers or expand up to 7* other devices

InteliNeo 5500 1.1.0 Datasheet

Product description InteliNeo 5500 is a microgrid controller that offers a cost-effective solution for combining traditional grid or gen-sets with renewable energy sources to create a reliable and efficient

ComAp's InteliNeo controllers that redefine microgrids are now

With ComAp's Spot Price Dispatch tool, customers can optimise their electricity expenses and take advantage of dynamic real-time energy pricing. For more information on both controllers,
