Enlight k2 wind

Overview

Enter Enlight K2 Wind – the silent revolution in sustainable power generation that's making traditional windmills look like medieval relics. This innovative system combines aerodynamic design with AI-driven optimization, creating what engineers call "the smartphone of wind. The project is an extension of the Kovačica wind farm, the second largest in the country. The Joint Stock Company Elektroprivreda Srbije and the company Enlight K2-Wind signed electricity purchase and balance responsibility contracts during trial and permanent operation from the Pupin wind farm for the entire installed capacity of 95.
