Hafslund (company)

The Hafslund corporation was founded on 18 March 1898 in order to build Hafslund power plant alongside Sarpfossen at Hafslund in order to supply a carbide factory with electricity. Construction started already in 1896, and the power plant was fully built in 1899 with installed capacity of 5200 kW. In 1907 the power demand had reached above the amount that Hafslund power plant could cover and there was built a transition line to Kykkelsrud power plant. This marked the beginning of Hafslun's exp
