Luteinizing Hormone: Function, Levels, and Reproductive Role

Learn about luteinizing hormone (LH), its role in fertility, testosterone production, and ovulation. Discover how LH levels impact reproductive health and testing options.

What is the ratio of Liquid Hydrogen to LOX

The stoichiometric ratio is 8:1 (LOX to LH mass), but having excess hydrogen in the exhaust increases the specific impulse of the engine, so in practice it will be lower. It differs for

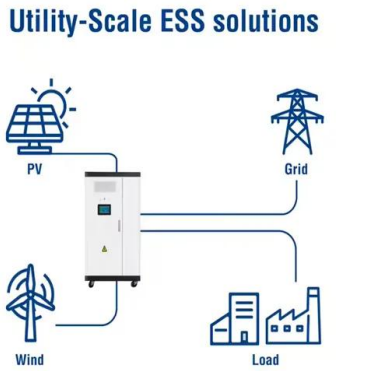

Pronunciation: "-lh," "-ão," "-em," & "r" , Portuguese Language Blog

Except maybe it's more of a "pour-tá" sounding word. See where I'm getting here? Don't stick too much to your teacher's, friends, or whoever your Portuguese influences' accent if you think

Why do LOX/LH rocket engines burn oxygen-rich mixtures? : r

LH is 70.85 kg/m3 LOX is 1141.00 kg/m3 There are various trade-offs (in engineering complexity, efficiency, and more) to consider when choosing a propellent / oxidizer mixture ratio. Many

Liquid-fueled rockets have higher specific impulse than solid rockets and are capable of being throttled, shut down, and restarted. Only the combustion chamber of a liquid-fueled rocket needs to withstand high combustion pressures and temperatures. Cooling can be done regeneratively with the liquid propellant. On vehicles employing turbopumps, the propellant tanks are at a lower pressure than the combustion chamber, decreasing tank mass. For these reasons, most orbital launch vehicles use liquid propellants.

How to determine the most efficient o/f ratio : r/rocketry

I have a degree in physics, but I'm not sure if this is the right answer. It makes sense on the surface, but maybe there's something deeper going on. First, I'm

Low levels of LH may mean you have a pituitary disorder, anorexia, malnutrition, or are under stress. If you are male, abnormally high LH levels along with low levels of testosterone may mean that your

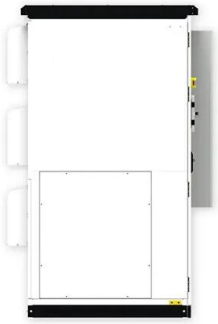

Luteinizing Hormone Release

Schally et al. (1971) proposed that only one hypothalamic hormone was responsible for the release of both LH and FSH, and there is much evidence to support this. Chemical and enzymatic inactivation

Luteinizing Hormone (LH): What It Is, Normal Levels

Luteinizing hormone, also referred to as LH, is a hormone produced by the pituitary gland. In women, is responsible for the maturation of follicles, ovulation and
