Topclass Solar

Ipp renewable energy

Overview

For most IPPs, particularly in the renewable energy industry, a feed-in tariff or power purchase agreement provides a long-term price guarantee. IPPs have been successful in driving the electricity sector's transition to renewables globally, owning the majority of the currently operating renewable energy generation capacity. An independent power producer (IPP) or non-utility generator (NUG) is an entity that is not a , but owns facilities that generate electric for sale to and end users. CanadaElectricity regulation in Canada is governed at the provincial level, and there are differences between the provinces.
