Overview

These benchmarks help measure progress toward goals for reducing solar electricity costs and guide SETO research and development programs. Yet after $9 trillion globally over the last decade spent on wind, solar, electric vehicles, energy storage, electrified heat and power grids, the renewable transition is still a linear one; the renewable share of final energy consumption is slowly advancing at 0. Utility solar PV pricing refers to the cost of large-scale solar photovoltaic (PV) projects that supply electricity to the grid, typically operated by utilities or independent power producers (IPPs). These projects range from megawatt (MW) to gigawatt (GW) scale, making them the most cost-effective. Department of Energy (DOE) Solar Energy Technologies Office (SETO) and its national laboratory partners analyze cost data for U.
