## Overview

Browse the search facilities here to find other solar suppliers, installers, manufacturers, service providers, consultants and many more. It is provided by the World Bank Group as a free service to governments, developers and the general public, and allows users to quickly obtain data and carry out a simple electricity output calculation. The Global Solar Power Tracker is composed of worldwide facility-level data on utility-scale (1 MW+) solar photovoltaic (PV) and solar thermal facilities, as well as country-aggregated distributed (<1 MW) solar PV data. When assessing a renewable electricity site and creating a list of possible project locations, consider the types of project options available and the site elements they would require.
