Solar power in jamaica

Overview

Jamaica's electricity sector is dominated by non-renewable generators that use petroleum products, primarily Bunker C fuel oil and automotive diesel which generated 93% of the annual output for 2014. There is a small contribution from a few small hydroelectric plants and a couple of wind farms, one of which, Wigton Wind Farm. The following are some of the larger installations currently connected to the grid:More than 20,000 Jamaican homes are expected to be powered. In June 2012 Energy Minister Phillip Paulwell disclosed that, approximately 16,000 homes in remote parts of the island which do not have electricity are to be.

Solar power in jamaica
