Industrial Postdoc: Battery Materials from Recycling

Sales Manager Building Solutions, Stora Enso Wood & Energy page is loaded## Sales Manager Building Solutions, Stora Enso Wood & Energylocations: Stockholm: Home office - Sweden:

Stora Enso & Northvolt partner to develop wood-based

Stora Enso and Northvolt are joining forces to create sustainable batteries using lignin-based hard carbon produced with renewable wood from Nordic forests.

Stora Enso joins ATENA+ to advance European sodium-ion battery

Through this collaboration, Stora Enso reinforces its role in the sustainable battery ecosystem, showcasing how bio-based materials can power the future of European energy storage.

Stora Enso and Altris to develop sustainable battery

Stora Enso has partnered with Altris, a Swedish developer of sodium-ion batteries. The two companies aim to further advance the development and commercialisation of a

sustainable battery value chain

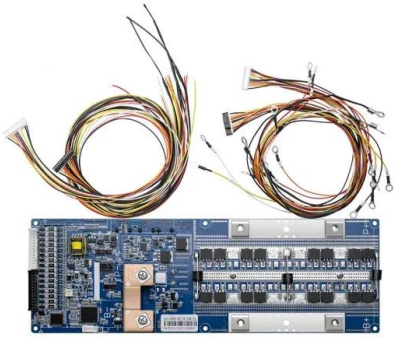

Stora Enso und Partner entwickeln eine europäische

Stora Enso hat sich mit Partnern in der Batterie-Wertschöpfungskette zusammengeschlossen, um eine nachhaltige Batterieversorgung mit Hartkohlenstoff auf Holzbasis

Stora Enso Battery Innovations: How Trees Are Powering the Future

Picture this: your future electric vehicle might contain battery components that literally grew on trees. Stora Enso, the Finnish forestry giant, has partnered with Swedish battery manufacturer Northvolt to

Lignode by Stora Enso for battery cellmakers

Lignode® by Stora Enso Lignode® by Stora Enso is a hard carbon that is a bio-based alternative to graphite made from lignin intended for the battery market. Lignin is an existing side stream in the

Lignode makes it possible to make batteries from trees

The solution: Stora Enso's Lignode®: a battery material made from trees Lignode® is a material that replaces synthetic graphite with lignin, a by

Paper and Wood,Stora Enso Turns Lignin into a European Batte

One of the most promising breakthroughs is coming from Finland, where Stora Enso is turning lignin--a natural polymer found in trees--into advanced carbon materials for batteries and other high-tech

Stora Enso and Northvolt partner to develop wood-based battery

Stora Enso and Northvolt are joining forces to create sustainable batteries using lignin-based hard carbon produced with renewable wood from Nordic forests. The aim is to develop the

Stora Enso and Altris collaborate to develop and commercialise

Stora Enso has partnered with Altris, a Swedish developer of sodium-ion batteries. The two companies aim to further advance the development and commercialisation of a sustainable

Stora Enso to Produce Next-Gen Batteries from Södra's Wood Pulp

It comes as Stora Enso secured a purchase agreement with Södra overnight - now building the world's largest kraft lignin factory at Mönsterås in Sweden - with supplies key for Stora
